INTRODUCTION

In order to replace any internal parts, you first need to take off the back panel of the hair dryer. This guide will show you how to do that.

TOOLS:

- Phillips #2 Screwdriver (1)

Step 1 — Back Panel

⚠ Caution: Unplug the hair dryer before attempting this guide. Leaving the device plugged in may result in electrocution and damage to the device.

- Hold the hair dryer by the handle so that the back panel faces up.

Step 2

- Remove the two 15.875 mm Phillips #2 screws from the back panel.

Step 3

- Starting from where the cord attaches to the handle, pull apart the two plastic panels.
- Continue separating the back panel, working along the seam.
- With moderate force, completely remove the back panel from the hair dryer.

To reassemble your device, follow these instructions in reverse order.
